DSAS Comments

What did you like best about how the course was taught?

Comments

I feel that the professor really cared about the subject material and cared that we learned it.

If you were teaching this course, what would you do differently?

Comments

I feel that the professor had a difficult time understanding that not everyone understood math the same way that he did. I wish that some of the problems we were given on quizzes or tests weren't as far outside of the ones we did in class. I also wish that we had more review times in class as the recitation teacher didn't review well.
